

UoR progress on open research

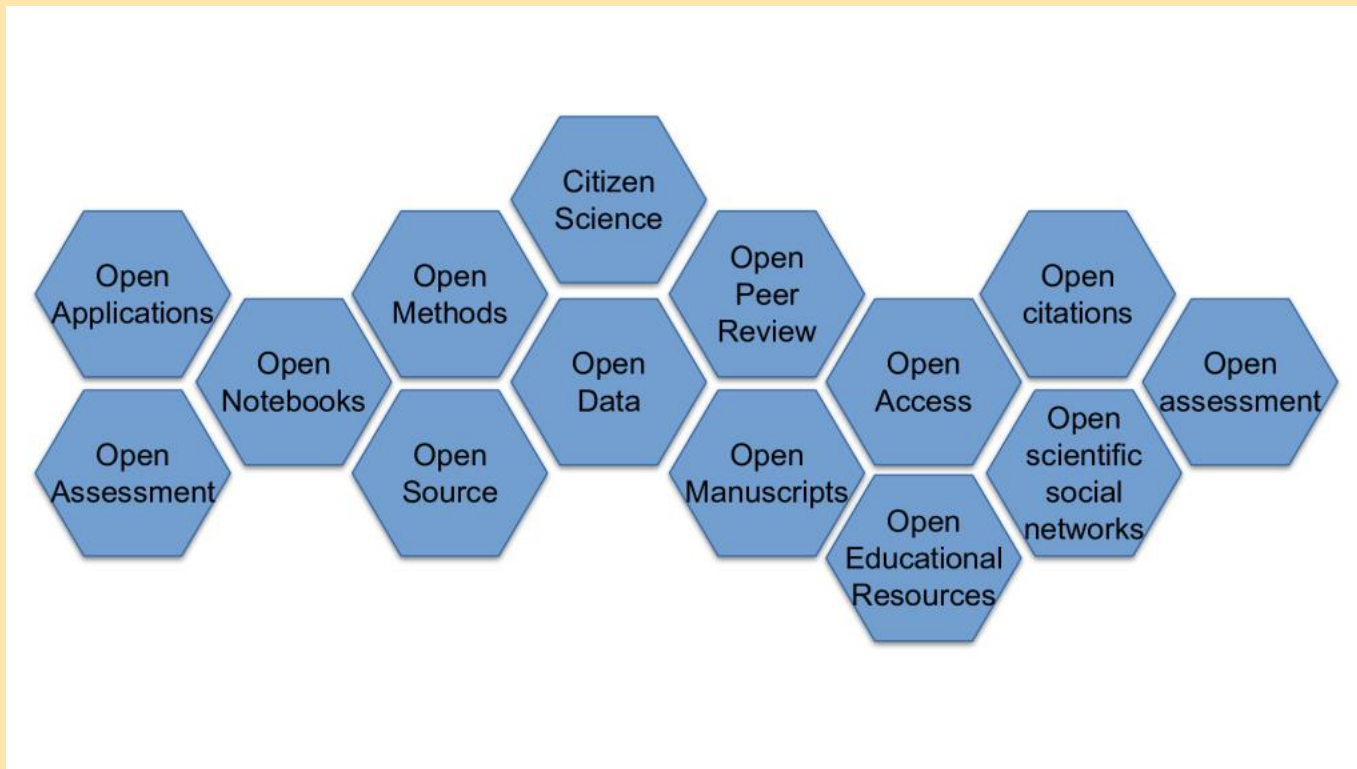

Professor Parveen Yaqoob

Deputy Vice-Chancellor and PVC Research & Innovation

Professor of Nutritional Physiology

What is open research?

Open research is scholarly research that is **collaborative**, **transparent** and **reproducible** and whose outputs are **publicly available and usable**, maximizing the possibility of public benefit.

Benefits of Open Access

Benefits of open research

Researchers

- greater visibility & reach
- increased efficiency
- funding
- collaboration/networking

Funders

- increased visibility & reuse of funded research
- greater funding impact
- greater ROI

General Public

- faster knowledge transfer
- increased understanding and expertise
- promoting engagement in science & research

Organisations/ NGOs

- enhanced access to research
- more effective advocacy/lobbying

National Governments

- evidence-informed policy
- promoting Human Rights and democracy

Of **5,905 articles related to COVID-19** published from 1 December 2019 to 30 April 2020:

- Only 13.6% published underlying research data (supplementary information/data repository)
- Only 1.7% referenced data in a data repository
- Only 1.2% published data in re-usable/machine-readable formats (xlsx/xls/csv)
- > 75% documents were PDF or docx/doc: mostly text and graphics not raw data

Lucas-Dominguez, R. et al. The sharing of research data facing the COVID-19 pandemic. *Scientometrics* (2021). <https://doi.org/10.1007/s11192-021-03971-6>

12 things you can do to be open

Publish open
access

Make it FAIR

Release your
code

Archive web
resources

Use a pre-print
server

Engage with open
peer review

Pre-register your
research plans

Advertise your
data or software
as a research
resource

Share your

community or
project

Open research champions

- Model open research practice
- Use their networks to advocate for open research and share information
- Help peers and colleagues and signpost University support
- Organise and help to deliver open research training and information sessions
- Take part in open research forum meetings
- Lead and take part in projects & initiatives, both within & outside the University
- Inform University strategy by advocating the needs of their School/discipline
- Central to the Open Research Action Plan

- National, peer-led consortium promoting robust research, providing training activities and disseminating best practice.
- Seeks to understand factors contributing to poor reproducibility and develops approaches to counter them.
- Broad disciplinary representation.
- Institutional lead, Phil Newton and local network lead, Etienne Roesch.

Open research action plan 2021-23
